Label Copy Template

Label copy is the text information that appears on physical releases (CDs, vinyl, cassettes) and in distribution system metadata. Correct label copy is required by distributors, pressing plants, and retailers.

What Is Label Copy?

Label copy refers to all the text that appears on or inside a physical music release, including the front cover, back cover, inner sleeve, spine, and disc/label, and the corresponding metadata submitted to distributors and retailers.

For digital-only releases, the equivalent is the metadata submitted to your distributor (DistroKid, TuneCore, Believe, OKListen). Errors in label copy result in incorrect credits, misattributed royalties, and display errors on streaming platforms.

Release Identification

Release Title: _____
